

Title: Strategic Diplomacy: Russia–Bangladesh Relations in the 21st Century

Tags: **Geopolitics** **Diplomacy** **Energy Security** **International Relations**

1. Overview

This research paper explores the evolving diplomatic and geopolitical relationship between Russia and Bangladesh in the 21st century. It examines strategic cooperation in energy security, defense collaboration, and regional geopolitics, highlighting how bilateral relations are shaped within the broader Eurasian political framework.

2. Key Focus Areas

- **Russia–Bangladesh Diplomatic History:** Analyzing the foundation and evolution of bilateral ties from the late 20th century to the present.
- **Energy Security & Nuclear Cooperation:** A deep dive into the Rooppur Nuclear Power Plant (NPP) project and its strategic significance for Bangladesh's energy future.
- **Eurasian Geopolitical Dynamics:** Understanding the role of Bangladesh within Russia's "Greater Eurasian Partnership" and regional security.
- **Foreign Policy Alignment:** Evaluating how both nations navigate multi-polar global politics and trade dynamics.

3. Methodology & Key Findings

- **Methodology:** Utilized qualitative research methods, including policy analysis and secondary data from international relations journals.
- **Key Findings:** Strategic partnership is no longer limited to trade but has shifted towards long-term energy and technological dependence, strengthening Bangladesh's position in the Indo-Pacific region.

4. Academic Impact

- **Presentation:** This research was successfully presented at a university-level seminar organized by the Department of Political Science, National University.
- **Recognition:** Highly commended for its critical analysis of non-Western diplomatic frameworks.
